The GameDriver Effect

IN VR GAMING

Swipe >

StatusPro brings the NFL experience to VR, as the first league-endorsed company blending data, extended reality (XR), and real engagement in a quarterback simulation. Available on platforms including Meta Quest, PSVR, Pico, and SteamVR, it sets a new standard for sports gaming technology.

STATUSPRO

ROOM8GROUP
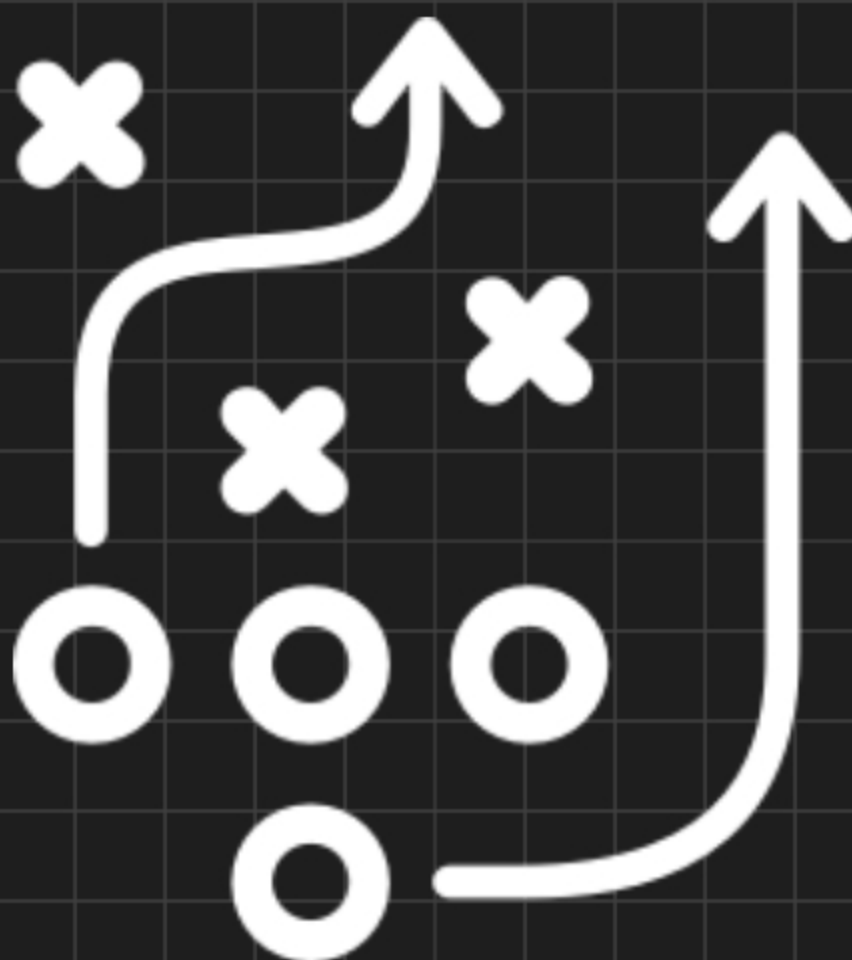

Tackling the Challenges

- High variability in gameplay outcomes (fumbles, interceptions, etc.)

- Inconsistent manual testing across diverse customization options

- Requirement for multi-platform support with consistent feature validation

- Extensive testing time, tripling with each platform addition

The GameDriver Playbook

Automating the playbook with XRDriver, GameDriver transformed StatusPro's testing process, enabling:

• Automated, consistent 100+ validation tests per build
• Significant reduction in testing time, even with deep customization features

4

Scoring **Big** with Metrics

• Surpassed 1,000,000 users, doubling the VR average playtime

• Jumped to Top 10 in Sales on the Meta Quest Marketplace

• Season playthrough test-time slashed from 7 hours to 25 minutes

5

Efficiency Gains:

Testing a game which previously took 25 minutes, now could be completed in even less time, with a full season's testing cut down from 2 days to 7.5 hours. GameDriver enabled up to 1500 validations per playthrough and facilitated automatic smoke tests without the need for constant supervision.

6

Platform Agility:

By leveraging GameDriver, StatusPro efficiently tested across multiple platforms simultaneously, a task that traditionally would have tripled testing time.

7

A New Era for VR Gaming

Conclusion: Leveraging GameDriver, StatusPro has not just tackled the immediate challenges but has redefined VR game testing standards.
Together,were not only enhancing the game development lifecycle but are also setting new records in immersive gaming experiences.
